让家家户户都有美仁芯

Have MR Chip in Every Home

家电，是人们美好生活的助手。
它提供的便捷、舒适，让我们有更多空间去享受生活。
而今，建立在诸多家电技术解决方案的基础上，
我们不断创新，从“芯”开始，
让家电更加高效、节能、可靠、智能，
让生活更加美好。

世界顶级的半导体专家已汇聚“美仁”，
以创新的精神、卓越的科技，
让家家户户都有美仁芯，
与您共同创造美好生活。

Household appliances help mankind to have a better life.
They provide convenience and comfort,
allowing us more space to enjoy life.
Now, building on the foundation of countless technology
solutions for the home appliances,
we continue to innovate, with the "Chip",
to attain greater efficiency, energy-saving, reliability, and
intelligence in our home appliances,
to better a better life.

The world's top semiconductor experts have converged at MR,
with innovative spirit and technology excellency,
to have MR chips in every home.
MR and you, we create the better life.

公司简介

Company Profile

让家家户户都有美仁芯

Have MR Chip in Every Home

上海美仁半导体有限公司成立于2018年12月，总部位于临港松江科技绿洲园区，是一家专注于工业半导体开发和销售的集成电路设计企业。公司目前的主要产品是覆盖家电芯片全品类的四个产品系列，包括MCU、功率芯片、电源芯片和IOT芯片等。在满足客户对高抗干扰能力、高可靠性和高性价比的芯片需求基础上，美仁将致力于提供基于物联网的全屋智能整体解决方案。

Established in December 2018, MR Semiconductor Ltd. (hereinafter MR Semi) is located in Lingang Songjiang Science and Technology Oasis Park, Songjiang District, Shanghai China. The firm is an IC design company specializing in developing industrial semiconductor. MR Semi focuses on providing strong anti-interference, highly reliable and cost-effective IC for home appliance industry. Currently there are four product series including MCU, IPM, PMIC and IoT related IC. The company commits to provide not only chips but total IC solution for smart home in the near future.

无晶圆半导体公司

A Fabless Semiconductor Company

专注于工业半导体的开发和销售

Specializing in the development and sales of industrial semiconductors

管理和技术团队

Management and Technical Team

世界级半导体公司工作经验的管理和技术专家

Management and Technical Experts With Working Experience in the World's Top Semiconductor Companies

公司的核心团队拥有平均20年以上的世界级半导体公司的开发和运营经验，保障了公司产品开发的顺利实施和在技术上的领先地位。公司产品全部拥有自主知识产权，目前已获得20项集成电路布图设计登记证书。

MR's core team have an average of 20+ years of experience in development and operation with the world's top semiconductor companies, ensuring the smooth implementation of product development and technological leadership. MR holds proprietary intellectual property rights for all its products, and has obtained 20 certificates of ownership for layout designs of integrated circuits.

研发创新

R&D Innovation

世界顶级半导体公司工作经验的管理和技术专家，
按国际通行的高科技创业公司模式由高管和技术团队独立运作，
行业经验丰富、结构层次合理的团队为现实和未来打下坚实基础

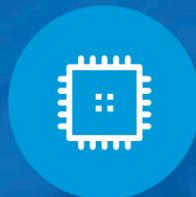

Management and technical Experts with working experience in the world's top semiconductor companies, operated independently by senior executives and technical teams according to the internationally accepted high-tech start-up company mode. Team with rich industry experience and reasonable structure, laying a solid foundation for the present and the future.

创始团队

Founding Team

博士2人，硕士1人，行业经验
20年以上，硅谷工作经验10年
以上，30余项美国专利
1 Ph.D degree, 2 master's degree,
20+ years of experience in the
field, 10+ years working
experience with Silicon Valley and
30+ patents registered in USA

芯片设计

Chip Design Team

硕士占比70%，
行业经验15年以上，10人
70% master's degree, 15+ years
of experience in the field:10

产品运营

Product Operation Team

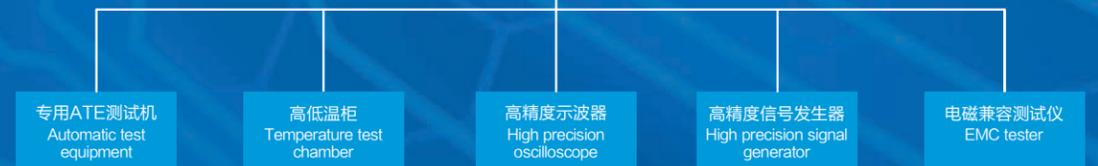

硕士占比33%，
行业经验10年以上，15人
33% master's degree, 10+ years
of experience in the field:15

公司建立了高端的芯片检测实验室
完备的实验设备和经验丰富的测试工程师

MR has established a high-end chip testing laboratory well equipped with
complete experimental equipment and experienced test engineers.

主要设备

Main equipment

技术优势

Technical Advantages

为白电定制芯片，更高更快更强

Chips customized for major appliance, more reliable, faster and stronger

团队拥有平均20年的世界顶级半导体公司的开发和运营经验，对半导体行业有深刻理解，保证技术上的领先地位，开发“先进、可靠、安全、高性价比”的高品质产品，为客户提供卓越服务。

Team members have 20+years working Experience in the world's top semiconductor companies and profound understanding of semiconductor industry.To develop "advanced, reliable, safe and cost-effective" high-quality products, providing excellent services to customers.

- 反复快速启动的可靠性高
- 内嵌SRAM自检 (BIST) 任意多项式CRC校验
- 使用可靠性能最好的SST的eflash
- Repeated quick start.Built-in
- SRAM test (BIST) Arbitrary polynomial CRC validation.Using the best reliable performance of
- SST eflash.

- 安全时钟，符合安规需求
- 用户代码双重保护
- 启动代码无风险在线升级，预防更新过程掉电
- Safety clock meets safety requirements.Double protection of
- user code.Risk-free online update of
- startup code, preventing power loss during update.

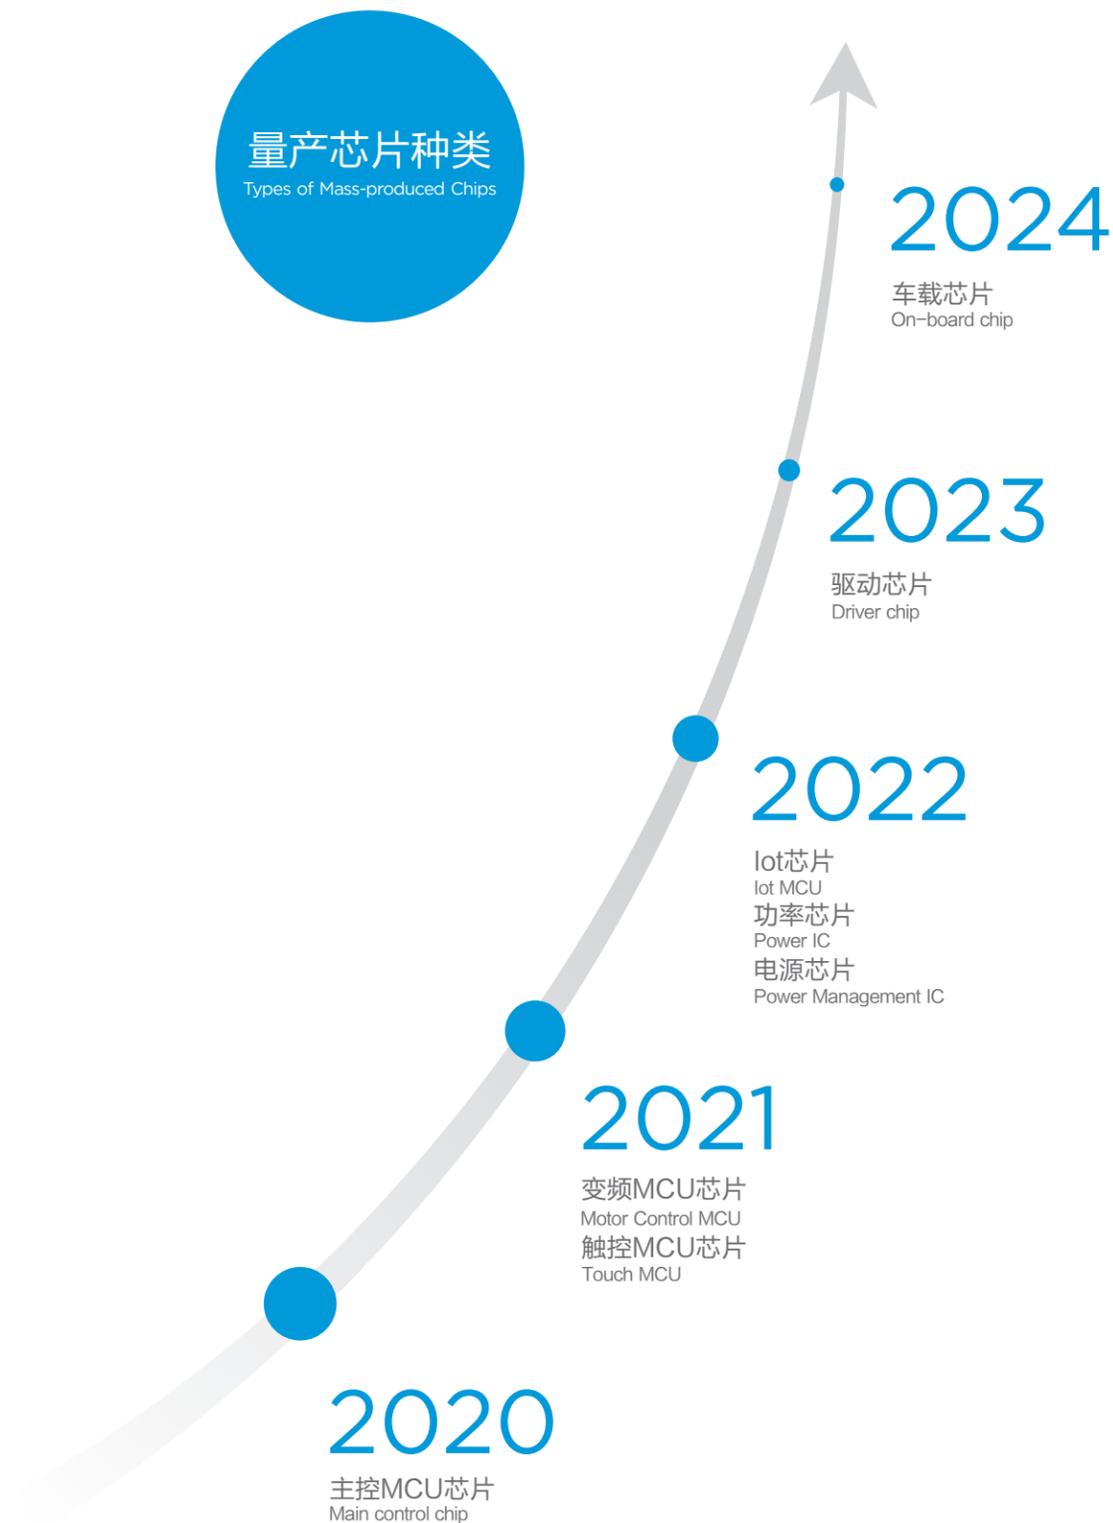

- 高速12位ADC，支持多种触发模式，符合各种应用场景
- 所有GPIO均可映射为外部中断，所有GPIO均可唤醒芯片，支持多种开发场景
- High-speed 12-bit ADC, supporting multiple trigger modes, suitable for various application scenarios.All GPIO can be
- mapped as external interrupts and wake up chips to support various development scenarios.

- 内建高精度时钟，可不需要晶振，减少外部器件
- 创新的电容触控算法，不需要外挂大电容
- 精选制造工艺，提高性能，降低成本，避免风险
- Built-in high-precision clock, eliminating crystal oscillator and reducing external apparatus.
- Innovative capacitance touch algorithm, eliminating external large capacitors.
- Selective manufacturing process, improving performance, reducing costs and avoiding risks.

启明系列

Venus Series

产品特点:

- 内置32bit Cortex-M0
- LQFP-64/44/32封装
- 256K flash空间
- 9通道12-bit SAR ADC
- CPU最高主频可配为32MHz
- 支持多资源外设UART, SPI, I2C
- 高可靠性, EFT和动态ESD大于4KV

Features:

- Built-in, 32-bit, Cortex-M0
- LQFP-64/44/32 package
- 256K flash space
- 9-channel, 12-bit SAR ADC
- 32MHz (Max.) CPU frequency
- Supporting multi-resource peripherals, such as UART, SPI, I2C
- High reliability, EFT and dynamic ESD greater than 4KV

产品应用:

- 适用于各品类家电
主控芯片应用

Applications:

- Suitable for main control chips of various major appliances

型号 Model	MR88F001DI/064	MR88F001DI/044	MR88F001DI/032

开阳系列

Mizar Series

产品特点:

- 内置32bit Cortex M33
- LQFP-64封装
- 256K flash空间
- 16K SRAM
- 16K Code RAM (CRAM)
- 31通道12-bit SAR ADC
- CPU最高主频可配为160MHz
- 锁相环倍频
- 支持多资源外设UART, SPI, I2C
- 增强型PWM模块
- 高可靠性, EFT和动态ESD大于4KV

Features:

- Built-in, 32-bit, Cortex M33
- LQFP-64 package
- 256K Flash space
- 16K SRAM
- 16K Code RAM (CRAM)
- 31-channel, 12-bit SAR ADC
- 160MHz (Max.) CPU frequency
- Phase Locked Loop (PLL)
- Supporting multi-resource peripherals, such as UART, SPI, I2C
- Enhanced PWM module
- High reliability, EFT and dynamic ESD greater than 4KV

产品应用:

- 各种电机控制应用

Applications:
